

Checklist Plumbing Plan

In order to perform a thorough Plumbing Plan review, the following specifications, drawings, and details must be submitted:

- A complete, sealed set of plumbing drawings and specifications, required if the required fixture count is 13 or more.

Plumbing fixture information to include:

- Occupant load
- Use group
- Sanitary drainage and vent system riser or flat line diagrams showing drainage, sizes, and vent terminations
- Potable water systems riser or flat line diagrams showing piping sizes and provisions for protection of the potable water system
